Selection Criteria - Researcher of the year

Please include a 1-2 minute video along with your paper submission addressing the selction criteria below.

Research

What were the research goals? What was the methodology adopted, and what was involved? (Data gathering, innovation, experimentation, evaluation and dissemination). What has been the practical application of the research?

Influence

Provide examples of how the research has been received both from peers, industry and other stakeholders. (Citations, publications, conferences, grants and other evidence of being influential and well regarded).

Impact

State the outcomes of the research and how the achievement adds to existing knowledge in the nominee's field. What effect it has it had on your research organisation? How has it affected industry, the community or other stakeholders?

Future Applications

What are the future possible applications of the research (eg commercialisation, as but one example)?

Commitment to Research

To provide context of the nominee's research submission, please list the nominee's five career-best research outputs.
